

Advitiya Jadhav

Princeton Jct., NJ | jadhav31@purdue.edu | +1 732 853 5756 | linkedin.com/in/advitiyajadhav | github.com/ocowala

EDUCATION

Purdue University

B.S. in Computer Engineering

- GPA: 3.7 | Junior Standing (75+ Credits)
- **Coursework:** Data Structures, Digital System Design, Advanced C Programming, Linear Algebra, Differential Equations, Multivariable Calculus, Electrical Engineering Fundamentals

Expected Graduation: May 2028

West Lafayette, IN

WORK EXPERIENCE

Software Development Intern

Milliman, CMH Health Practice

May 2026 – Aug 2026

Brookfield, WI

- Engineered end-to-end API key security for CORAL, Milliman's web-based actuarial value and benefit plan relativity platform, implementing key rotation, role-based permissions, and 2FA while reducing database query latency by 30%
- Developed an LLM-powered drug pricing lookup tool spanning 20,000+ drugs, integrating Claude and GPT-5.5 with a custom token-efficient auto-mode that cut usage by 25%
- Automated report generation by building a UI supporting 35+ exportable template combinations to Excel, cutting generation time by 35%
- Migrated CI/CD pipelines and legacy infrastructure from Azure DevOps to GitHub Actions, eliminating over \$2,000 in monthly billing costs

Assistant Web Developer

Purdue Extension, ANR Web Development Team

Jun 2025 – Present

West Lafayette, IN

- Developed and maintained responsive web components for Purdue's ANR extension sites using WordPress, CascadeCMS, and React
- Optimized website accessibility and load performance across pages, improving user engagement metrics by 20%
- Developed the ANR Expertise Database, refactoring the schema to improve query performance and data accuracy by 35% across 1,000+ educator records, and reducing specialist lookup time by 40%

Artificial Intelligence Researcher

InspiritiAI

Jan 2023 – May 2023

Remote

- Developed advanced object detection algorithms for autonomous vehicle pedestrian tracking using YOLOv7 and PyTorch as part of an intensive AI research program designed by Stanford graduates
- Presented research findings at an online symposium to Stanford graduate students, earning commendation for innovation

PROJECTS

Car Auction Prediction Market | *Python, Node.js, Express, React, PostgreSQL*

- Built a live prediction market aggregating real-time auction listings from Sotheby's, Bring a Trailer, Gooding & Company, and Christie's via custom Python scrapers, storing normalized listing data in PostgreSQL and powering a Node.js/Express market engine where users forecast whether a vehicle will sell above a set price threshold
- Built a React frontend surfacing live auction feeds, active markets, and supplementary statistics (historical sale trends, model-specific pricing analytics), growing the platform to 1,000+ monthly active users

ExtensionLLM | *Python, LangChain, Vector Database, React*

- Built an LLM-powered search interface aggregating internal and external Purdue Extension webpages into a unified knowledge base, using LangChain to orchestrate retrieval-augmented generation (RAG) pipelines over a vector database of embedded documents
- Enabled Purdue Extension educators to scope new projects and discover subject-matter experts via natural language queries, surfacing the most relevant pages, contacts, and prior work through a custom React search frontend

Spellkasten | *React, D3.js, Node.js, Express, JavaScript*

- Built an interactive word-graph visualization mapping 10,000+ commonly used words as nodes, connecting them by semantic similarity using D3.js force-directed graphs and a Node.js/Express backend
- Implemented a shortest-path search across the word graph, enabling users to find the minimum chain of connected words between any two selected words in real time

SKILLS

Languages: Python, Java, C++, C, SQL, JavaScript, TypeScript, Swift, MATLAB

Frameworks & Libraries: React, React Native, Next.js, Spring Boot, NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, OpenCV, YOLOv7, BeautifulSoup

Tools & Platforms: AWS, Azure, Firebase, MongoDB, Vercel, Git, Podman, Docker, GitHub Copilot | **Certifications:** AWS Certified Cloud Practitioner

AWARDS

- **Hackathons:** Best AI Hack for Social Good, Best Accessibility Hack, 3rd Best Hack @ HackPHS; Best Hack @ HackTCNJ
